

Payroll Management Services

365 Bel Marin Keys Blvd.
Suite 200
Novato, CA 94949

Get in the fast lane - integrate your time clocks on the information highway

Replace high touch, high cost time clock payroll input with an automated direct connection into **Time2Pay™** payroll and human resources management on the Web.

If you are not yet using automated time capture for your hourly workers then your input time,

overpays, and clerical errors exceed the cost of a complete **Time2Pay™** time keeping system every year!

Payroll begins with time keeping. A good time recording system will:

- Enforce uniform policies for breaks, meals, and overtime
- Eliminate the cost and mistakes inherent in totaling employee timesheets
- Automate tedious calculations of regular, overtime, and special hours
- Dramatically cut down on employee calls to payroll and HR staff with time recording questions
- Track labor specific to individual jobs, shifts, temporary work assignments, or other overrides of normal work

Our **Time2Pay™** payroll system accepts automated time recording from almost every brand of time clock and timekeeping system. Once your time clock setup is defined to **Time2Pay™**, your time data becomes payroll with a few clicks on the Web.

And we've gone even further – we've packaged specific time keeping systems for your specific needs. Accuchex provides only the most reliable equipment from major manufacturers, backed up by expert on-site support. So you can be confident that your time clocks and your payroll always work together with **Time2Pay™**.
